

HCLSoftware

Unstoppable IT Operations. Unbreachable AI Defense.

One AI-powered portfolio spanning cybersecurity, business automation, and IT operations.

Embrace AI. Withstand AI.

AI is no longer a roadmap item. It is mainstream, increasingly autonomous, and already part of the enterprise attack surface. Reactive defense and static operations cannot keep pace.

HCL Intelligent Operations

HCL Intelligent Operations unifies cybersecurity, business automation, and IT operations in one AI-powered portfolio. Adopt the capability you need first, then expand across the rest.
Secure IT. Automate IT. Run IT.

Secure IT | Cyber Ops

Reduce risk. Secure every application and endpoint. Stay continuously compliant.

Platform	Role in the Portfolio
HCL AppScan	Full-spectrum testing: Secure applications across the development lifecycle Genuine-risk prioritization: Find, validate, and fix exploitable flaws earlier
HCL BigFix Compliance	Continuous control: Assess and enforce compliance across endpoints and servers Actionable findings: Turn policy gaps into remediation at enterprise scale
HCL BigFix SaaS Remediate	Risk-based prioritization: Identify vulnerabilities most likely to be exploited Automated remediation: Close exposure without adding infrastructure

Outcome:

Lower risk across applications and endpoints

Continuous compliance at enterprise scale

Faster closure of exploitable exposure

Automate IT | Business Ops

Automate workloads. Govern costs. Elevate employee experience with AI.

Platform	Role in the Portfolio
HCL UnO+	Universal orchestration: Coordinate workloads, applications, data, and processes Governed execution: Combine agentic intelligence with deterministic automation
HCL iControl	Business intelligence and automation: Connect insight with operational action Coordinated workflows: Govern cost and automate work across systems and teams

Outcome:

Lower manual effort and operating cost	Reliable execution across hybrid environments	Governed automation at enterprise scale
--	---	---

Run IT | IT Ops

Automate workloads. Govern costs. Elevate employee experience with AI.

Platform	Role in the Portfolio
HCL BigFix Endpoint Management	Continuous visibility: Manage distributed endpoint and server environments Automated action: Patch, configure, and remediate at enterprise scale
HCL BigFix Service Management	AI-driven service management: Streamline requests, incidents, and remediation Faster resolution: Connect intelligent self-service with operational action
HCL HIVE	Full-stack observability: See across infrastructure, applications, networks, and experience Closed-loop operations: Correlate signals and turn insight into remediation

Outcome:

Consistent control across the IT estate	Reduced disruption and faster resolution	Predictable, resilient operations at scale
