

HCL BigFix Compliance

HCL BigFix

Continuous Endpoint Compliance for Banking and Financial Services

HCL BigFix Compliance helps banks maintain continuous compliance and reduce cyber risk by providing near real-time visibility, automated enforcement, and audit-ready reporting across highly distributed banking environments. It enables banks to secure servers, workstations, ATMs and cloud-connected endpoints while meeting stringent regulatory and operational requirements.

Key Capabilities of HCL BigFix Compliance

Continuous configuration enforcement at scale

HCL BigFix Compliance enforces secure configurations continuously across the endpoint estate, preventing drift caused by patches, updates, and routine operational changes. It applies **over 50,000 security checks aligned with CIS, DISA STIG, PCI-DSS, HIPAA, and NIS2**, and automatically restores systems to approved baselines the moment deviations occur.

Automated remediation of configuration drift

HCL BigFix compliance automatically remediates misconfigurations and security gaps at scale without manual intervention. Its autonomous agent allows remediation to execute even when endpoints are disconnected from BigFix servers, ensuring drift is corrected promptly and exposure is minimized.

Compliance analytics and audit-ready reporting

HCL BigFix Compliance delivers near real-time compliance reporting without relying on periodic or audit-driven scans. Compliance data is continuously collected and updated, eliminating manual evidence gathering and reporting delays.

Value for banks

As patches, updates, and routine operational changes are applied across banking systems, configurations can drift from approved baselines. Continuous compliance enforcement keeps configurations compliant and simplifies compliance reporting by making deviations easier to visualize and address

Value for banks

Manual remediation is slow and difficult to scale across large banking environments, leaving systems exposed longer than necessary. Automated remediation corrects non-compliant systems as soon as issues are detected.

Value for banks

When compliance is assessed only during audits, gaps remain hidden for long periods. Continuous compliance monitoring keeps reporting and compliance up to date without waiting for audit-driven scans.

Risk-based vulnerability prioritization with CyberFOCUS

HCL BigFix CyberFOCUS helps prioritize vulnerabilities using **Known Exploited Vulnerabilities (KEVs)** and threat intelligence to identify CVEs most likely to be exploited. This enables focused remediation while maintaining uptime across critical banking systems.

Value for banks

It helps improve vulnerability prioritization by focusing remediation on those actively exploited by threat actors. This helps banking teams reduce risk and protect system uptime while using limited resources more efficiently.

Near real-time visibility across the entire endpoint estate

HCL BigFix Compliance provides near real-time visibility across Windows, Linux, UNIX, macOS, third-party applications, and teller/ATM systems. It also supports banking environments at a global scale, delivering consistent visibility and performance across millions of endpoints.

Value for banks

It amplifies lean banking teams facing skills shortages by enabling accurate, near real-time visibility across complex, globally distributed endpoint environments. This reduces operational strain while supporting consistent oversight at scale.

Banking Customer Success

Driving audit-ready PCI compliance

A large financial services organization leveraged HCL BigFix Compliance to maintain continuous PCI alignment and significantly reduce manual audit preparation by keeping systems compliant throughout the year.

Scaling endpoint compliance across a global bank

A global bank achieved complete visibility and compliance control across millions of endpoints, with HCL BigFix Compliance enabling faster remediation and consistent security enforcement across the distributed banking infrastructure.

By the Numbers

50,000+

out-of-the-box compliance checks

155M+

endpoints managed globally

300,000+

endpoints supported per server

Awards

Cybersecurity Breakthrough Award (2 years in a row)

Strengthen your bank's compliance posture with continuous enforcement and near real-time visibility.

About HCLSoftware

HCL Software is a global leader in software innovation, dedicated to powering the Digital+ Economy. We develop, market, sell, and support transformative solutions across business and industry, intelligent operations, total experience, data and analytics, and cybersecurity. Built on a rich heritage of pioneering spirit and unwavering commitment to customer success, we deliver best-in-class software products that empower organizations to achieve their goals. Our core values of integrity, inclusion, value creation, people centricity, and social responsibility guide everything we do. HCL Software serves more than 20,000 organizations, including a majority of the Fortune 100 and almost half of the Fortune 500. 02FEB2026.
